

Panacea

WAREHOUSE & MANAGER BARCODING solution

BANNERBRIDGE COMPUTER PRODUCTS

Bannerbridge operate in a business environment where fast reaction, total quality control and precise inventory are vital to keep ahead of the competition and Bannerbridge recognised that their existing IT solution wouldn't allow them to sustain their competitive edge.

As a company whose business relies on the fast supply of printers, spares and related products, Bannerbridge needed a proven solution that would be able to respond to very rigorous demands.

As a user of Sage CS/3, inventory control already formed an integral part of Bannerbridge's existing system but the unrelenting need for inventory control, quality control and accurate component tracking is crucial if both customer loyalty and satisfaction is to be maintained.

Panacea as a partner

Panacea subsequently delivered Professional Services, application integration, IT infrastructure, business applications and warehouse management software to create an integrated, responsive and precision-based IT environment capable of meeting Bannerbridge's business needs.

Meeting the need

The implementation of Panacea's Warehouse Manager system is a core component of the IT 'jigsaw' that helps resolve the problems inherent in tracking many thousands of small components and fulfil Bannerbridge's needs for fast response and order accuracy.

Comprehensive inventory control has been achieved with fast and efficient replenishment and stock movements thanks to the benefits of real time, radio frequency (R/F) handheld barcode scanners that integrate dynamically into the system.

*H@lping Business
to Grow*

// Barcode management in the form of Warehouse Manager has been the single most important factor in contributing to improved stock control, resulting in rationalisation of stock held, whilst being able to satisfy customer demand. //

Peter Buttress, Financial Director, Bannerbridge

Satisfied customers

Customer satisfaction at Bannerbridge has reached new levels due to a reduction in shipping errors, improved warehouse usage and more accurate inventory management. This means that the RIGHT products are available at the RIGHT time - a big differentiator between Bannerbridge and their competitors.

Bannerbridge provide clear evidence that any company looking to radically improve inventory control, warehouse utilisation and customer satisfaction can enjoy benefits and rewards by implementing Panacea's Warehouse Manager.

Warehouse Manager - in brief

By implementing the Panacea Warehouse Management system, YOUR business will be able to track and record:

- Goods receipts
- Stocktaking
- Sundry stock adjustments
- Works order processing
- Sales order despatches
- Inter-warehouse transfers.

Also included is the ability for warehouse staff to print barcode labels from order despatch details.

The benefits to YOUR business...

Benefits from the implementation of Warehouse Manager include:

- Greater inventory control
- Fast, accurate movement recording
- Improved warehouse utilisation
- Improved customer satisfaction through fewer picking errors
- Clear and concise barcode label production for component quality verification
- Resilient and reliable handheld technology enabling staff to move around freely
- Wireless, on-line transaction processing for real-time updates.

Components used at Bannerbridge:

- Panacea Warehouse Management system
- Panacea Professional Services consultancy
- Applications integration services
- Infrastructure
- Lifetime support services.

Panacea would be pleased to survey and provide detailed estimates and recommendations for all types of warehouse logistics projects.

**WAREHOUSE
MANAGER**
v2.0

Panacea's industry-leading warehouse management and barcoding product offers the following unique features:

- Platform independence for speedy development and support.
- Full, real-time warehouse functionality free from the constraints of cabling.
- Highly scaleable (from 1 to 100s of R/F terminals).
- Highly resilient for optimal up-time during peak periods.
- Graphical warehouse view showing warehouse optimisation and stock movement in real-time.
