

Rapid & Effective DISASTER RECOVERY Services from Panacea

The ability for any organisation to survive a major loss is limited unless an appropriate disaster recovery plan has been organised.

Losses may occur from a number of unforeseen events such as fire, theft, flood, gas explosion, terrorist attack or most importantly, a critical power failure.

Panacea can provide comprehensive recovery solutions to protect your IT investment, (both software and hardware), and keeping downtime to a minimum. Trust Panacea to secure the future for your business.

PANACEA'S SERVICES INCLUDE:

Planning & Consultancy

Detailed consultancy to produce a risk analysis report, to agree a mutually acceptable recovery plan. Our consultants will prepare a comprehensive business impact Risk Analysis report to cover the precise needs of an organisation. This report will form the basis of a proposal on actual system requirements.

Relocation

A recovery plan can be implemented within hours of a disaster, with the client actually deciding what constitutes the disaster. Relocation can be arranged under contract to strategically placed premises throughout the UK. The Panacea Disaster Recovery service provides for a wide range of plans from simple replacement equipment to complete office relocation.

Comprehensive Office Environment

Whatever your business needs - we can arrange them! Maybe you need a complete modern office environment that includes dedicated workstations, fax and telephones to ensure business continuity. We can even organise automatic switching of your telephone system to the relocation centres for optimal business continuity.

Other Disaster Recovery Services

■ Complete Software Setup & Test

To ensure compatibility, complete testing and commissioning of your system can be arranged at any time to ensure that you are completely satisfied with the recovery service. All major operating systems including SCO, UNIX, AIX, Novell, Windows NT, etc. are provided on the latest hardware server and workstation platforms, including full modem communications and print facilities.

■ From Simple Replacement Hardware to Complex Network Systems

The panacea service contracts can be tailored to meet your exact system needs. Whether for simple software or hardware recovery and replacement, through to complete office environments with the latest IT technology hardware a complete flexible approach is available to match your needs.

With Panacea Disaster Recovery we can plan, arrange installation and implementation and make it happen to ensure business continuity and survival for the future. With full accreditation to BS EN ISO 9001 quality control and Panacea total project management - we will ensure that your business needs are fulfilled!
